

# Global Business Consulting Services, Inc. (GBCS)

**Client Name:** Infosys - Allstate DASH - Pay Program IDM

**Project Title:** Allstate DASH - Pay Program IDM

**Project Details:** Migrate of existing MAR database '.Net' reports to Allstate's IDM Data Warehouse using ETL Ab Initio with Business Objects Reports. The reports will cater to objectives, monthly and annual bonus programs as well as new business policy/items/points metrics at week-to-date, month-to-date and year-to-date levels for Allstate's agents. In this effort, the Pay Program team will need to build end-to-end Data Warehousing tables using Ab Initio technology extraction, transformation and loading to Oracle Warehouse. ETL/Ab Initio data will be sourced from other Allstate applications as Truecomp and AllBridge and will reference existing IDM Master Data for referential benefits.

The ETL design will need to strictly adhere to Data Warehouse norms /good practices and engage extensive use of balance and control checks at multiple layers i.e. source, stage and base table loads to ensure clean, high-quality data in Allstate IDM Data Warehouse.

**Environment:** Ab Initio / UNIX

**GBCS Team Role:** ETL Architect

**Benefits to Client:** This is an extremely visible and critical Project for Infosys for its client Allstate. This application will ultimately generate reports for Allstate Business team on the basis of which payments will be served out to Allstate agents for its monthly and annual bonus schemes as well as new business agents.
