Global Business Consulting Services, Inc. (GBCS)

Client Name: Citi

Project Title: Citi Risk Credit

Project Details: Loads Data to cache and process with our batch cycle. Update DB with results after batch for others teams to process it.

Environment:Jenkins,Maven,JDK,RedHat,Gemfire,SVN & Oracle.

GBCS Team Role:

- **Build & Release team helps set up Jenkins for Citi Risk Credit projects to run on Maven supported by JDK.**

- **Build's created from Jenkins is deployed to DEVELOPMENT & UAT to validate the code changes.**

- **Once the results are fine. Build team creates new zip file containing all scripts & jars in it using Hermes Build tool(Citi Managed).**

- **The Zip file from Hermes is deployed to PRODUCTION following approved CHANGE REQUEST.**

- **L2 support manages PRODUCTION batch cycle and if any issues is escalated to DEVELOPMENT & Build team.**

Benefits to Client:

- **Dedicated team manages build helps developer to focus only on coding.**
- **Build team acts as bridge between Developer team & Support team.**
- **Build team monitors code changes in SVN & batch cycle in UAT.**
- **Build team helps in avoiding developers login to PRODUCTION environment in case of any issues.**
